

Aira EASV-X70

Features

EASV-X70 is a compact sliding solution for frameless glass panels, combining latest technology with an attractive minimalist design. The system is quick and easy to install and it integrates seamlessly into any design.

Suitable for glass panels of 8-10mm in thickness, and to a maximum weight of 70Kgs, the EASV-X70 conceals all of its sliding components within the top track, giving a pleasing aesthetic appearance. There is a choice between function and / or an anti-shock braking system, thereby providing an advanced and pleasing sliding action, whilst at the same time enhancing safety; fingers are protected from being caught in the closing cycle of the glass panel, which itself is also protected from impact damage. Double softbrakes, providing both soft opening and soft closing can be installed on a frameless glass panel to a minimum width of 675mm.
