Digital Door Viewer Function

When the doorbell rings, the indoor screen will automatically show the situation outside the door.

Live Viewing: View the person standing outside your door in real-time, allowing you to assess visitors before opening the door.

Two-Way Communication: Communicate with visitors without the need to open the door. Speak to them directly through the built-in microphone and speaker.

Remote Access via App: Access the same live viewing screen remotely via our dedicated mobile app from anywhere with an internet connection.

Talk to Visitors Remotely: Speak to visitors even when you're not at home. Engage with them through the app, providing instructions or reassurance.

Enhanced Security: Keep your home secure by verifying the identity of visitors before granting access, all from the safety of your smartphone.

Convenient Monitoring: Monitor your doorstep activity conveniently from your smartphone, giving you peace of mind whether you're at home or away.

High-Quality Video: Enjoy clear and crisp video quality, allowing you to see every detail of who is at your door, day or night.

Motion Detection Alerts: Receive instant notifications on your smartphone when motion is detected near your door, adding an extra layer of security.

User-Friendly Interface: Intuitive interface on both the device and the mobile app makes navigation and operation effortless for users of all levels of tech-savviness
