EUROART

LED Lighting Solution

For Commercial & Residential

EuroArt (U.K) Ltd with operators in blackburn UK develops and manufacture a comprehensive line of furniture fittings, including an extensive range of cabinet hinge, drawer runners, locking system, kitchen fittings, sliding systems, furniture handles, LED & related accessories.

Continuous research, new technologies and innovative design have positioned us among the world leaders of very reliable products with a high aesthetic value.

We ensure all products are tested and certified to internationally accepted industry standards issued by third party internationally recognized testing houses. Quality is incorporated in every stage of manufacture by the people behind the product. From design to machine operation, assembly and through to inspection every individual takes responsibility for their part in the design and manufacture of the product and contributes to a continuous quality control ethic. Function and form characterise the Euro Art products.

We have set up a dedicated export office with a single, challenging responsibility, to coordinate the export activities among all parts of the world. EuroArt will play a critical role in support of international architects, contractors and multinational corporations who demand the sophistication of quality product in every corner of the globe. Through specification writing, consulting and product selection we offer unmatched product solutions to meet the demands of today's modern buildings, while offering worldwide local support through our vast network of partners and distributors.

EuroArt will be proud to be given the opportunity to be your preferred leading specifier, distributor and technical service provider of architectural hardware, furniture fittings across worldwide construction industry. In addition to superior product quality, Euro Art offers a mix of product expertise at a pricing that is unsurpassed in the global hardware industry.

Fine Buildings, whether new structures or refurbishment, will always need fine quality fittings and EuroArt will be there to provide them, now and in the future.

Guarantee : To support the high quality and first class engineering that has gone into the EuroArt product range,we offer a two to ten years guarantee(subject to conditions) against defects due to faulty manufacturing, workmanship or defective material. The manufacturer agrees to replace any defective EuroArt product free of charge provided the product has been fitted in accordance with the fitting instructions and maintained correctly.

Malcolm Brown
Honorary Chairman

Dear Patrons,

After many months of development, it is with great emotion and pleasure, that I am introducing our new extended range of furniture fittings. Our team has worked with renewed focus and energy to improve our market share, reduce our cost base, streamline the supply chain and ensure launch of products on time to delight our customers.

After successfully supplying cabinet hinges, drawer runners, pulls, locks etc in UK market for many years, we have added LED, popup sockets, kitchen fittings & accessories to act as a single source supplier of all your furniture fitting & joinery requirements. We believe it would suit your needs greatly and deliver as per your requirement.

The catalog comes in much handier format and is structured clearly to help you find the fitting you are looking for - easier and faster. You will find a lot of new and interesting fitting and accessories in this catalog. We ensure all products are superior quality and are tested to meet high standards of third party certifications (SGS, RoHS, TUV, CE).

Euroart is committed to investments in new technologies to develop products that meet the challenges and opportunities of the growing market, including developing sustainable technologies. Euroart monitors quality performance and implements corrections to improve product performance, thereby improving customer satisfaction.

I would like to thank our employees as well as our extended partners, including dealers, OEM companies and other stakeholders for their hard work and commitment in this growing phase of Euroart. With already dominant market position across United Arab Emirates, Bahrain, Oman, Kuwait, Qatar etc, Euroart is growing market share across Africa, Saudi Arabia, Bangladesh & Sri Lanka.

In conclusion, I would say that we have immense opportunities, and we are optimistic about the new range of Euroart. We are always open for suggestions, ideas, help and are committed to a continuous development program.

Looking forward to your continued support, as we put in our best to meet your expectations!

Warmest Regards,

Malcolm Brown
Honorary Chairman

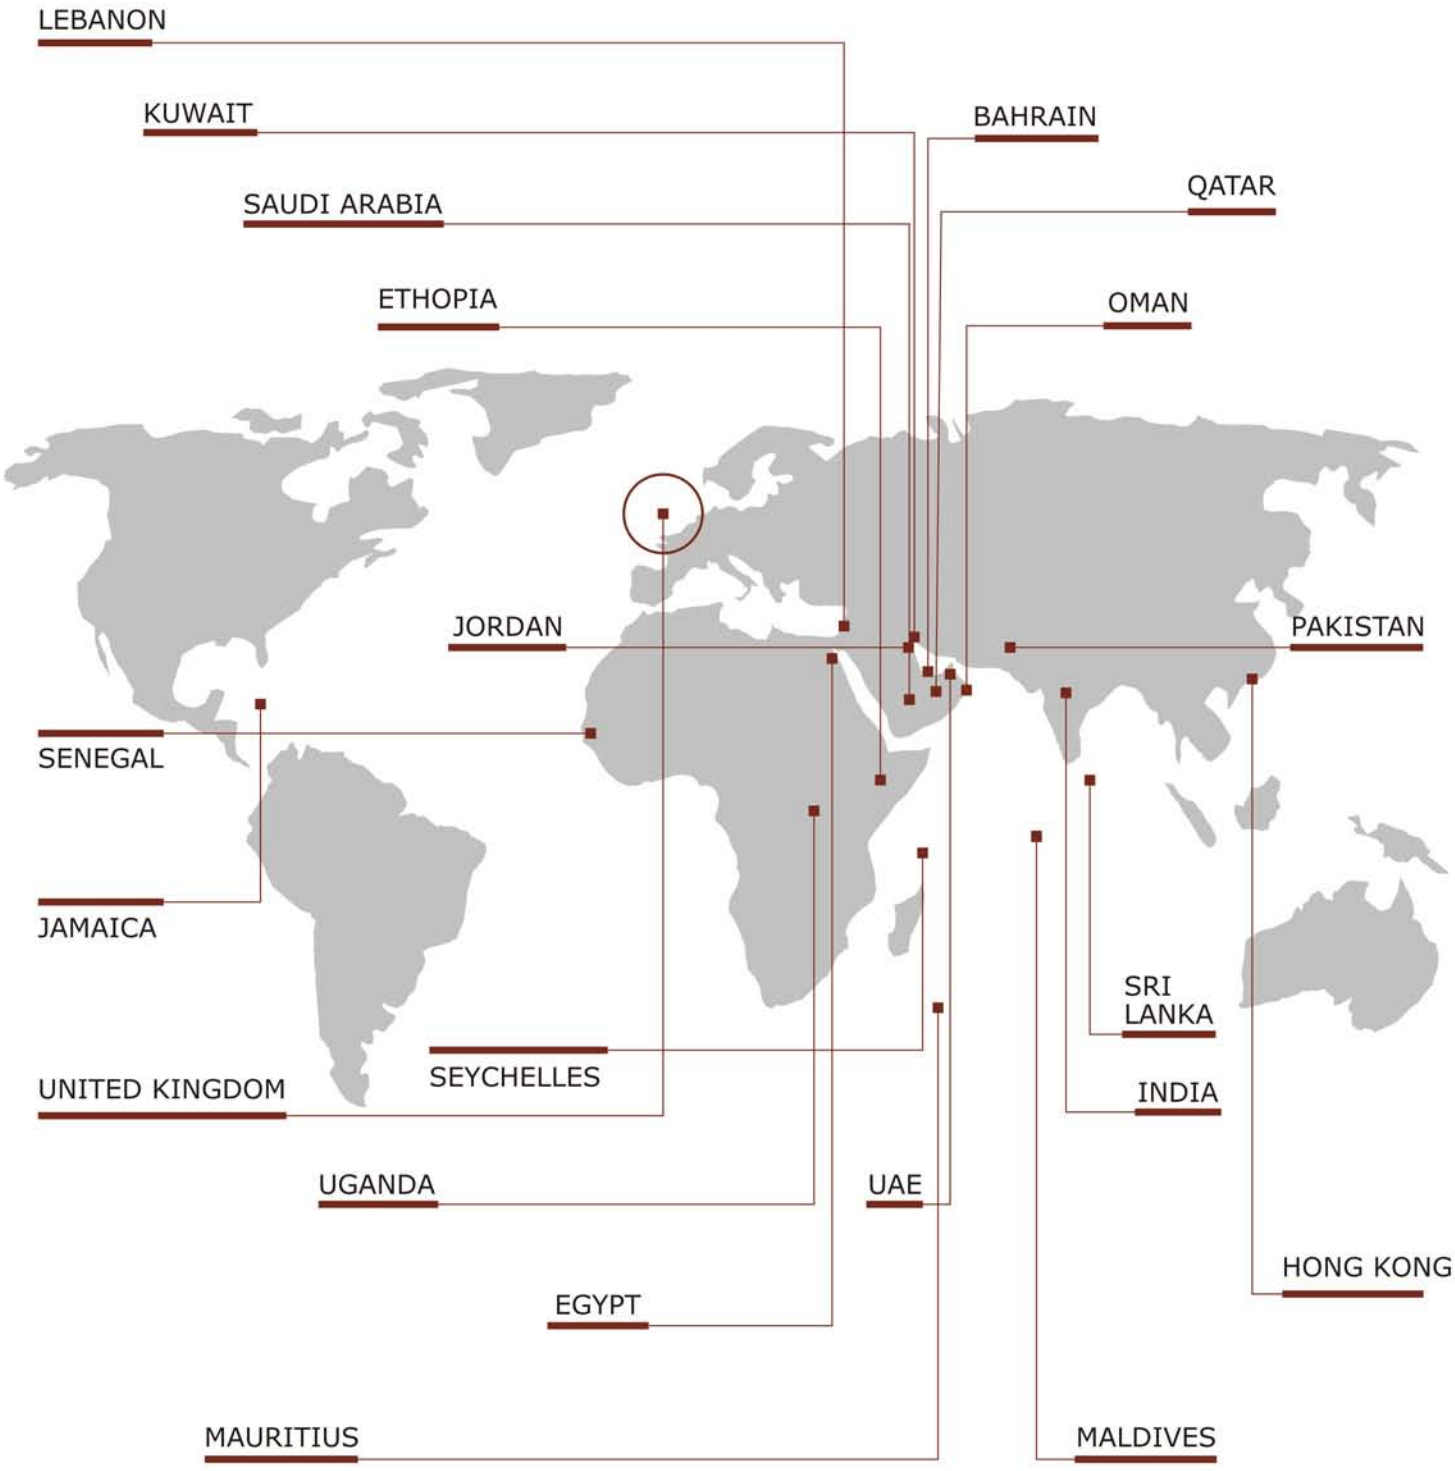
EUROART

Global Presence



EuroArt has two main distribution hubs - Blackburn, UK and Jebel Ali Dubai, UAE.
Blackburn, UK distribution center caters the europeon market where as Jebel Ali, UAE distribution center manages Middle East, Asia and Africa.

Our strong logistics helps us build worldwide presence by managing the supply chain flow from our factories to warehouses and to reach the final consumer.

Quality and Tested Production

EuroArt's Product development team works on three fundamental principles – knowledge, tools, and systematic process for conceptualizing. We are striving constantly to push our boundaries forward. We try to control costs and improve quality by applying zero-defect and efficiency-focused techniques. We believe that the process of designing products is profoundly different from the process of making them. EuroArt learns from whole system to bring best quality fitting for its customers.

Training and Development

Training is a prime opportunity to expand the knowledge base of all employees. Training and development provide the individuals and organizations with different benefits such as improved employee performance and increased employee satisfaction and morale. It addresses the weaknesses of employees and the organization, increases productivity, brings innovation, reduces employee turnover, and enhances company efficiency and profile.

EuroArt gives utmost importance to staff training and continuous development at the workplace, enabling EuroArt staff who are qualified GAI, AHC and FDAI and FF&E experts to maintain their knowledge of industry standards and regulations.

EUROART

THE ABC: OF LIGHTING TECHNOLOGY.

LED's (Light Emitting Diodes) can vary the properties of the light that is generated, and generate almost the entire colour spectrum. Unlike normal light bulbs and halogen lamps, LED's generate little heat. They use less energy and have a long service life.

ADVANTAGES OF LED'S

Long lasting
LED lights have an extremely long service life of up to 25 years or more than 40,000 to 50,000 hours.

Robust
LED's have an extremely small and robust design. This makes handling easier during furniture construction and transport.

Low heat generation
Because of their extremely low power consumption, LED lights generate hardly any heat. This means that LED lighting systems are particularly suitable for displays and furniture.

Energy-saving
LED lights use an impressive 90 percent less power than conventional light bulbs! This means that they can be used to implement modern lighting scenarios in furniture, and still be in line with the energy saving trend.

Powerful
Modern LED lights are bright and have a saturated light colour. They achieve full brightness instantly when they are switched on. LED furniture lighting therefore has a lasting effect at the push of a button.

Rich in variants
LED lights are available in different colours, and can be designed as colour changing lights. This allows the light colour to be coordinated with furniture contents such as exhibits in the best possible way.

LED technology

Drivers 12V

Spoiled for choice in the 12 V system
The LED lights are voltage-controlled and connected in parallel in the 12 V system. The plugs on the driver can be freely allocated. 12 V lights are the most widespread at present.

Drivers 24V

Powerful 24 V system
Technically speaking, the 24 V system is identical to the 12 V system, but has a considerably higher power level. 24 V lights can therefore be used when extremely bright lights are required.

Drivers 350mA

Spotlights in the 350 mA system
The LED lights in the 350 mA system are current-controlled and connected in series. This means that each plug has to be either occupied or bypassed. 350 mA lights provide extremely high light power and are particularly suitable for spotlighting.

Drivers 700mA

Spotlights in the 700 mA system
700 mA system is the same as 350 mA system. The LED lights in the 700 mA system are current controlled and connected in series. Hence in the same way the plugs are to be preoccupied or bypassed. The 700 mA lights are high powered and suitable for spot lighting.
