# METAL IN MOTION

BRAND NEW IDEAS  
FOR CREATIVE EXPERIENCES

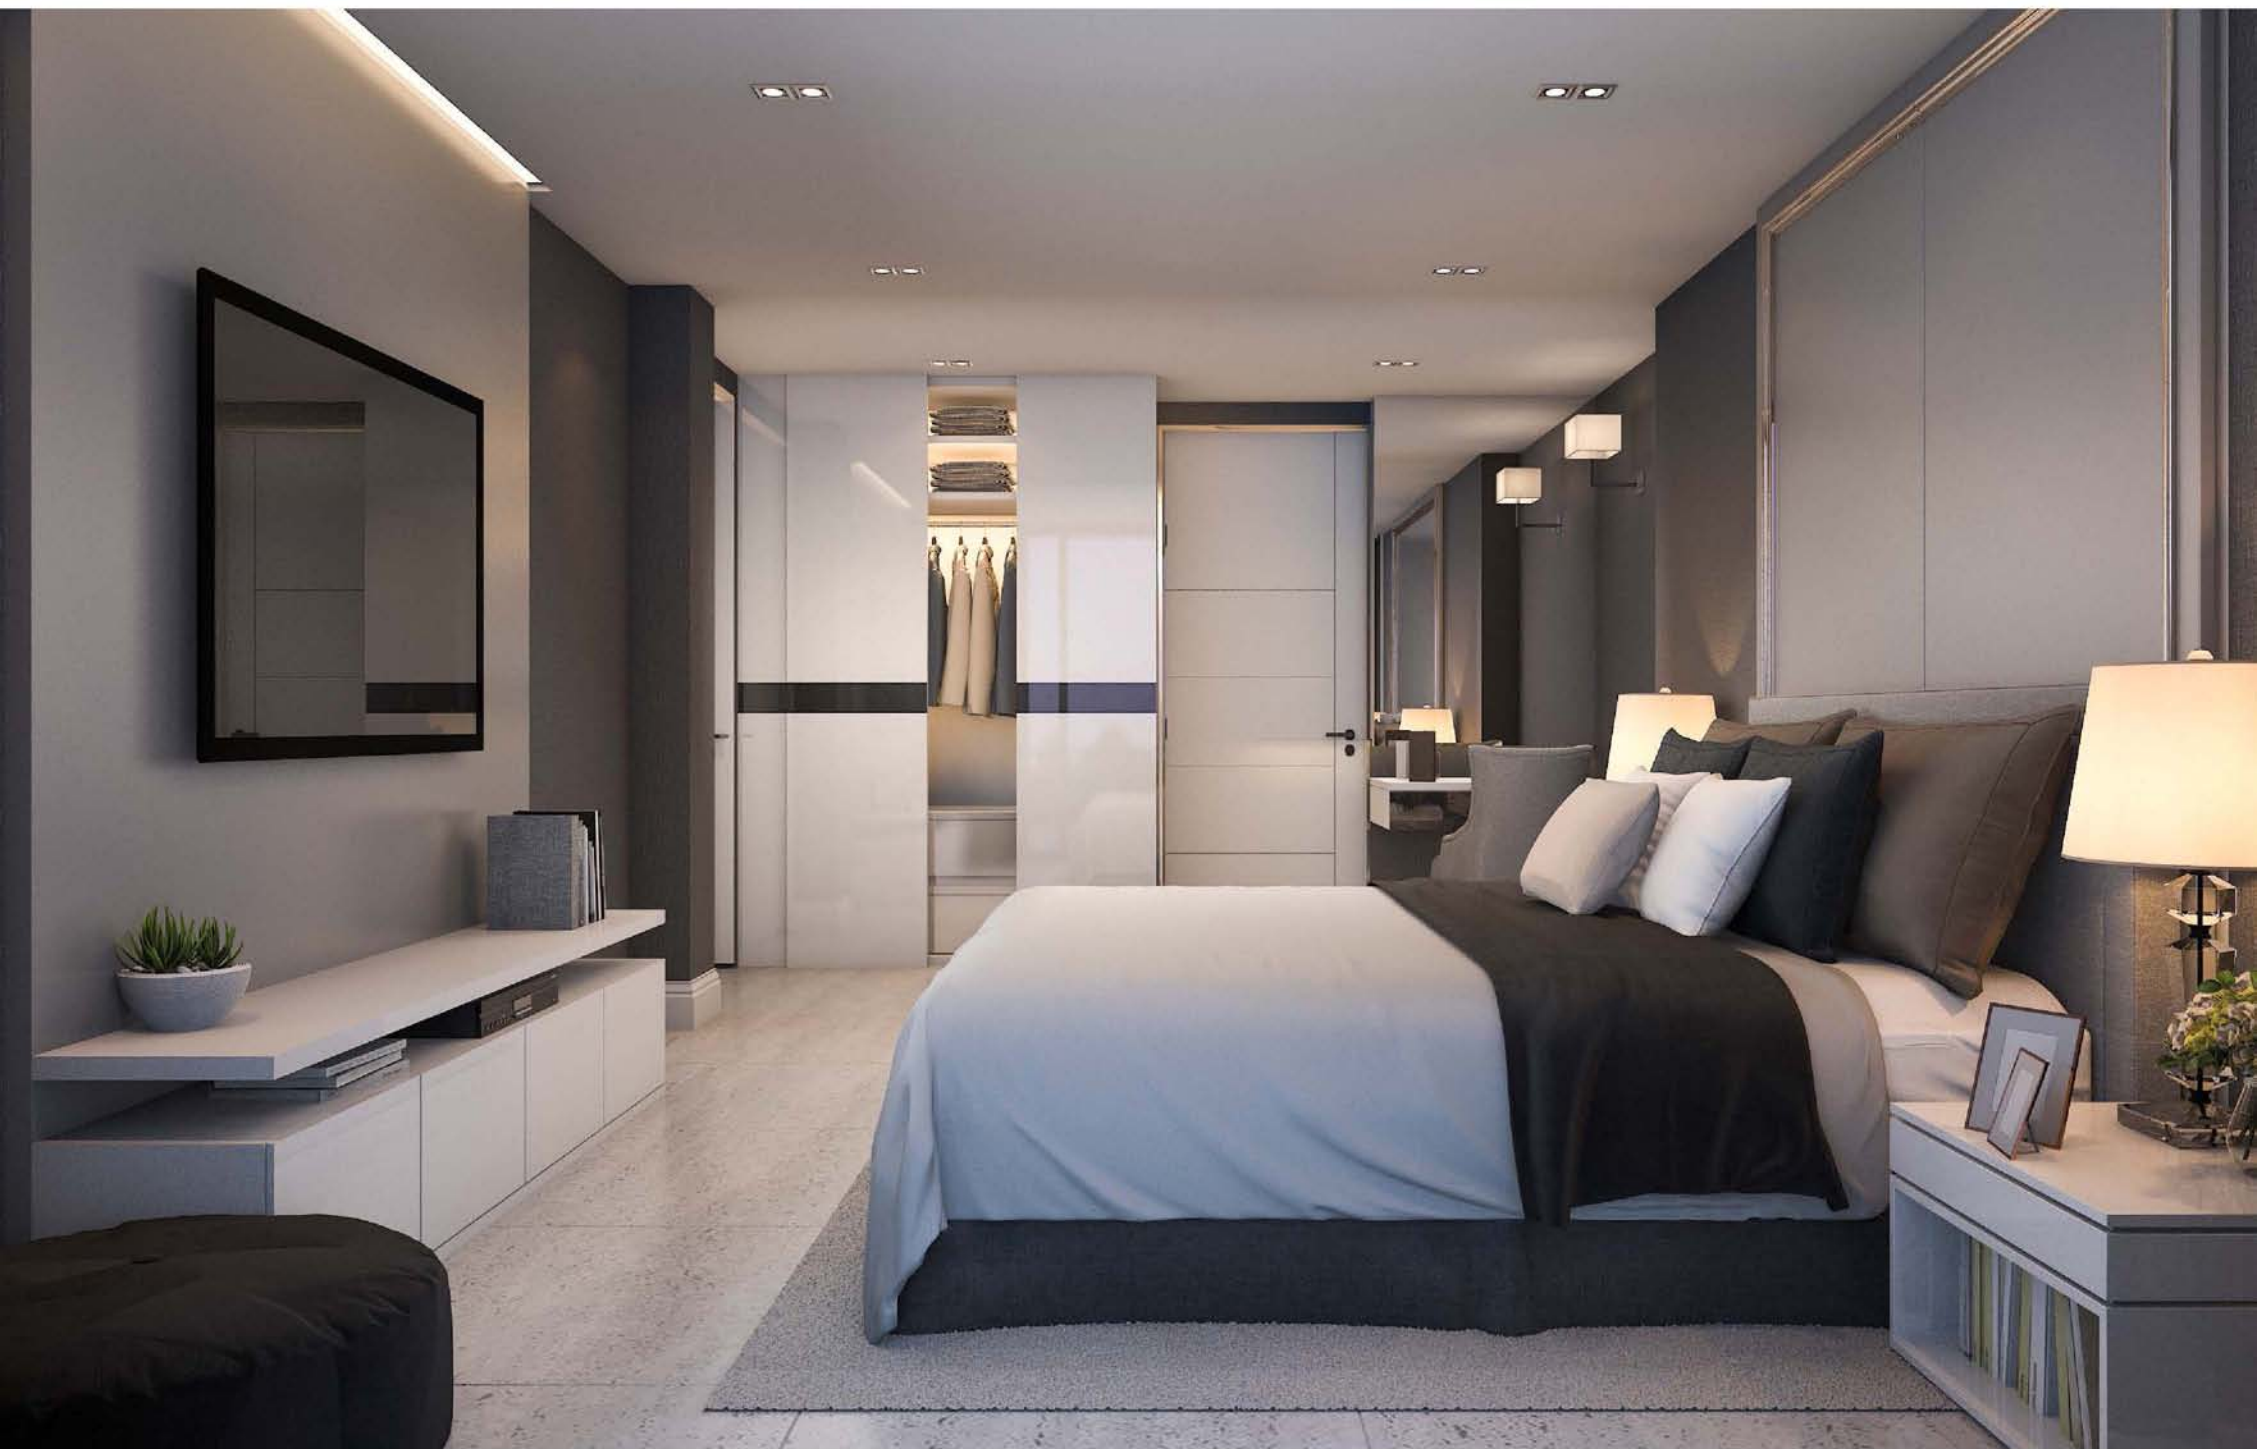

BORN IN THE  
**UNITED KINGDOM**  
BRED AROUND  
**THE WORLD**

# INSPIRE EMOTION

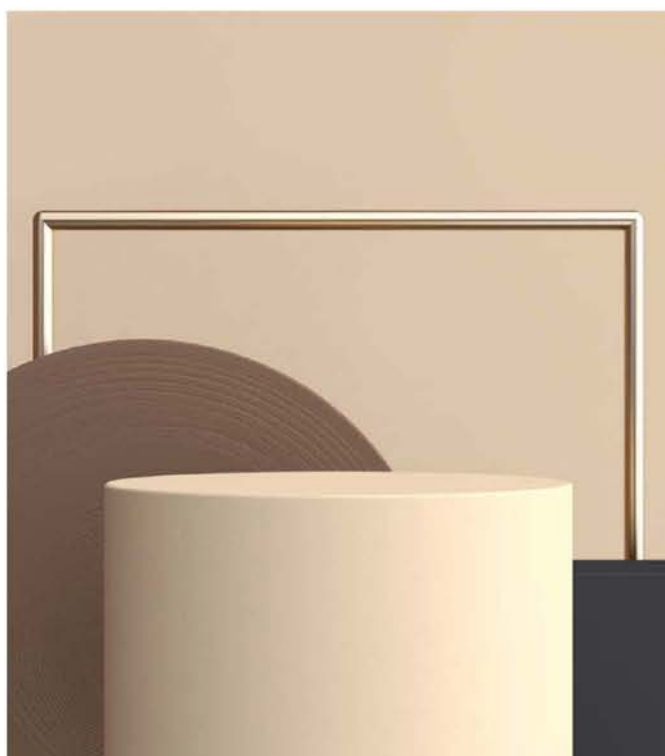

## METAL IN MOTION

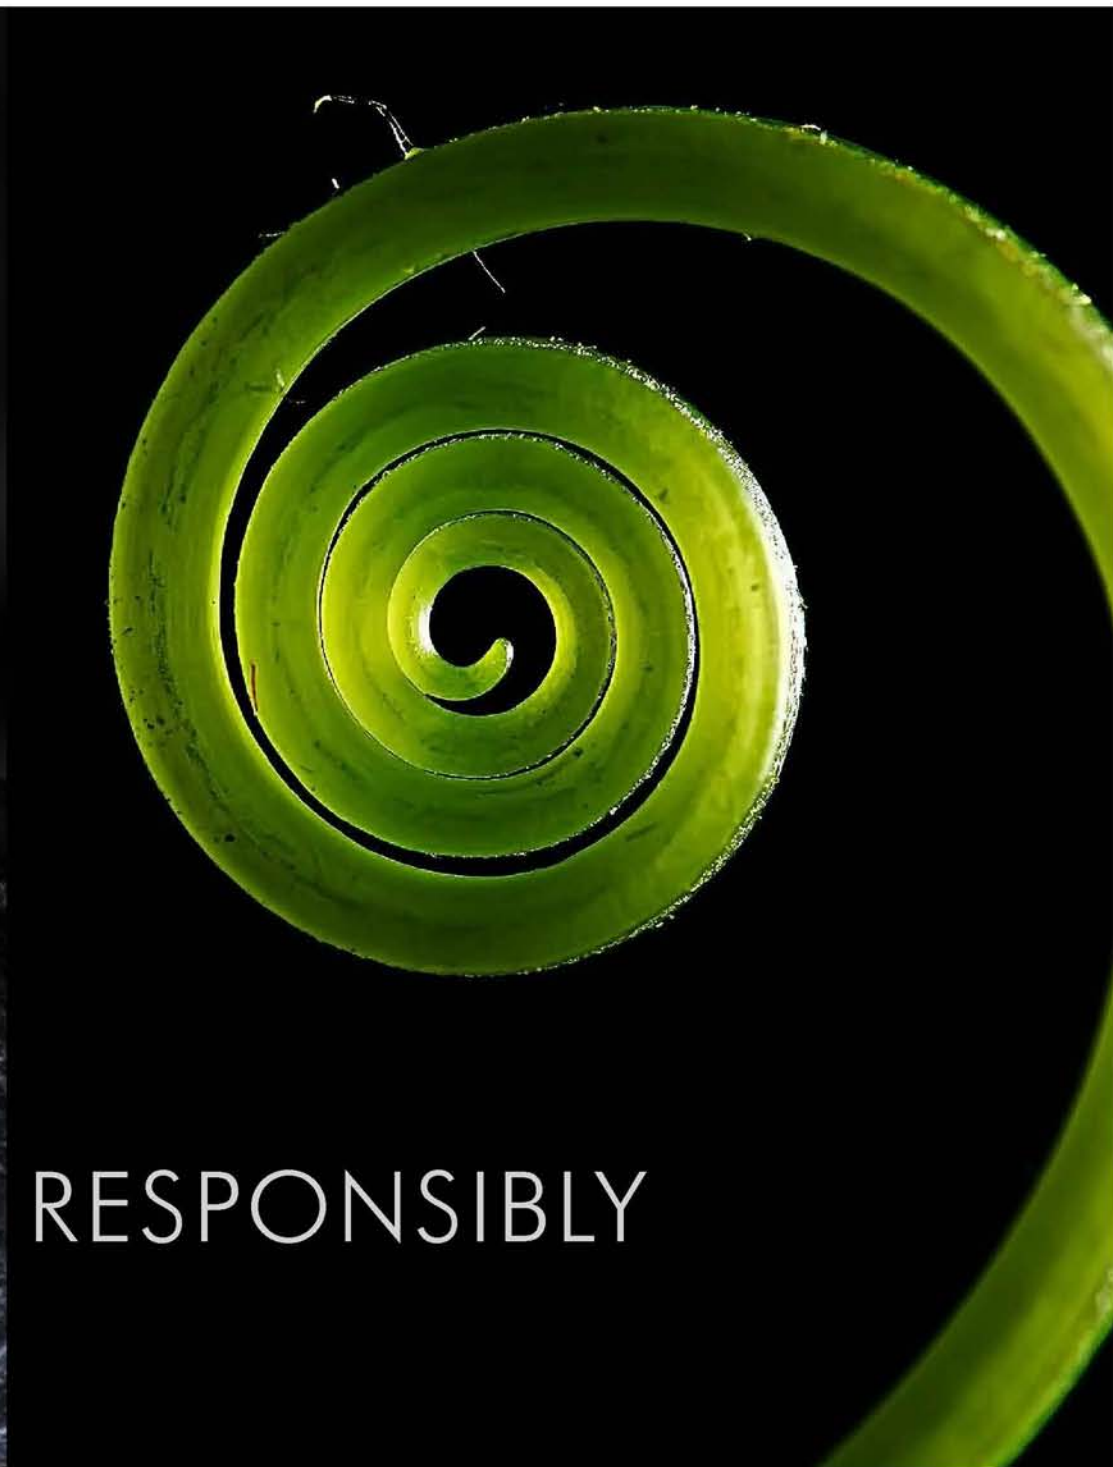

Architectural ironmongery is crucial to delivering meaningful interaction for users. Within each well-designed space lies the details - the functional touchpoints, where the user actually interfaces with the lever handle, pull handle, bathroom turns, coat hook and cabinet fittings. These are points

that create interactive pauses when the natural movement of the user is pleasantly interrupted - and an opportunity to experience the goals of detailing. EuroArt presents its fresh inspirations for designers and end users - Metal in Motion - collections researched and developed keeping in

mind the latest trends in the design industry. All created from mechanical components that complement performance-driven materials that are designed for durability, lasting finishes and the highest possible quality.

CREATING RESPONSIBLY

## Our Products

Designed by product engineers and manufactured to world-class standards, our products include door hardware and furniture fittings constantly upgraded with continuous research. EuroArt has proven its ability to design and produce stunning products that meet design intent.

## Our Services

Our reputation is one of providing quality products since 1986 in the UK and from 2006 in the MENA and South Asia region. Our services include developing hardware schedules by industry recognized qualified personnel, and partnering with stakeholders to provide value for money products and services in a timely manner.

## Our Commitment

- Provide certified products
- Partner with stakeholders to provide value for money
- Coordinate with door suppliers, consultants and multiple sub contractors
- Provide adequate warranty against manufacturing defects
- Ensure prompt after sales support

## Our Certifications & Accreditations

Qualified personnel  
Performance & fire tested products  
Created responsibly  
Serviced effectively

COMMITTED TO  
CRAFTSMANSHIP

# Welcome to Metal in Motion. Door hardware is more than a way to open, close and secure a space. To us, it is an integral part of a design theme.

---

In modern buildings, aspects of design and functional convenience have to be blended, with an exquisite entrance often setting the tone. We have focused on high quality product innovation and new technology.

EuroArt (UK) Ltd, with operations in Blackburn, UK develops and manufactures a comprehensive line of door hardware and furniture fittings. Continuous research, new technologies and innovative design have positioned us among the world leaders of very reliable products with a high aesthetic value.

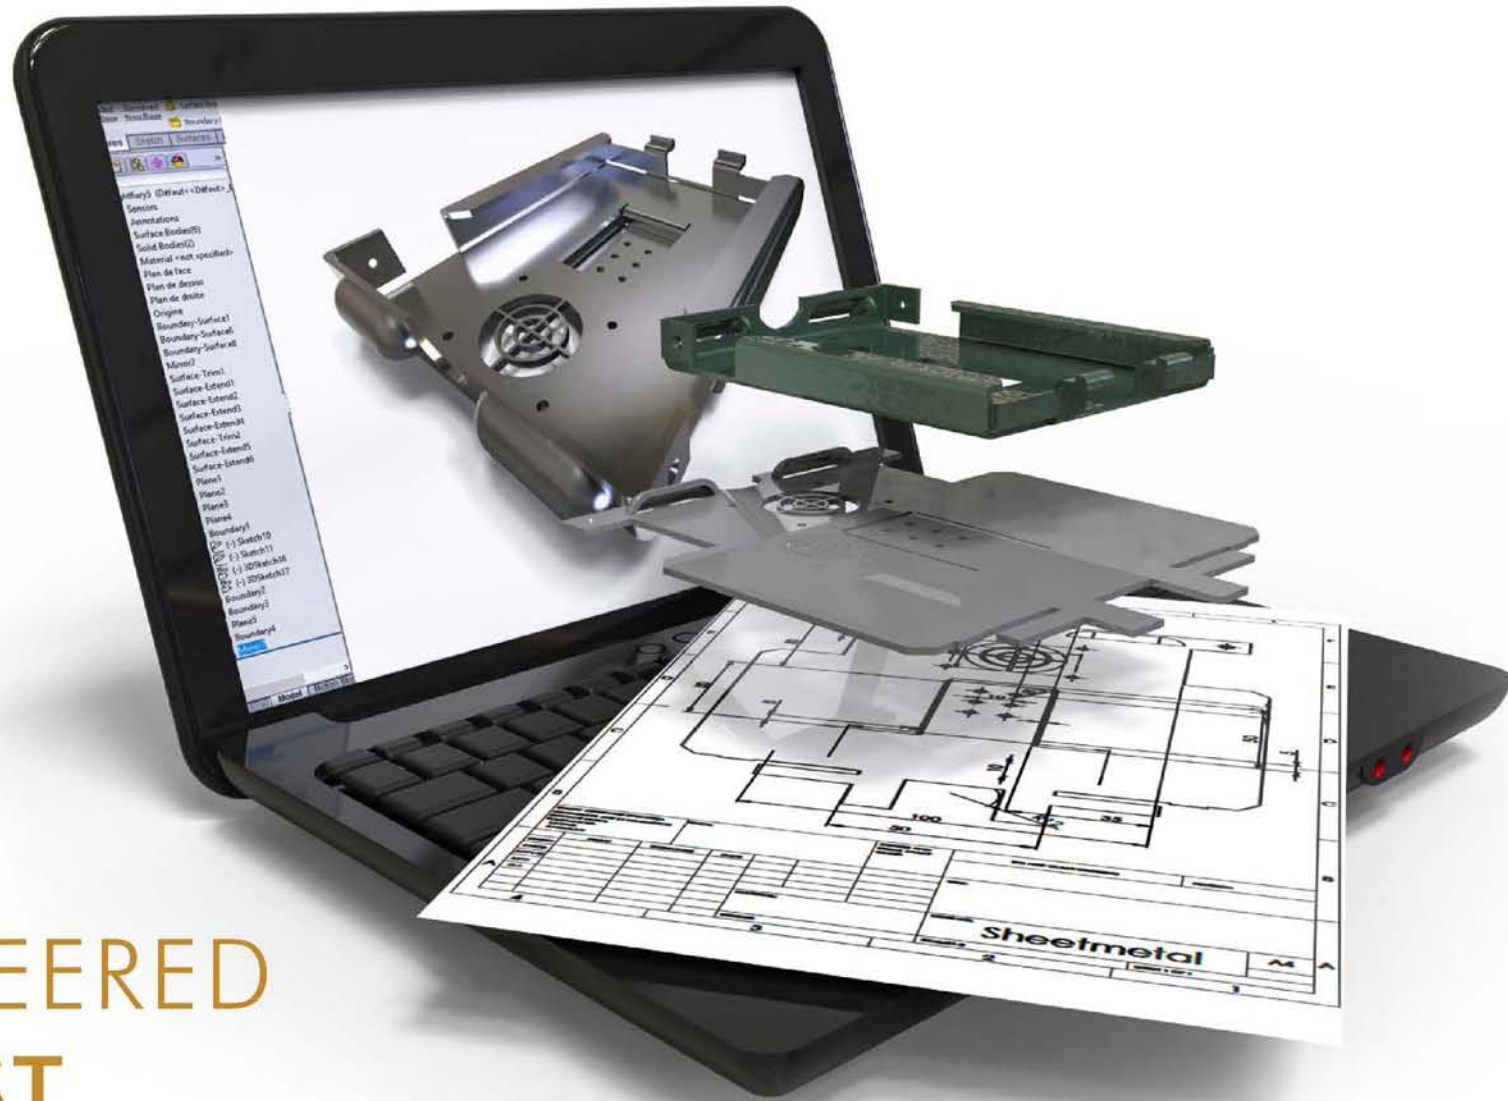

We have set up a dedicated export office with a single, challenging responsibility, to coordinate the export activities among all parts of the world.

Euro Art will play a critical role in support of international architects, contractors and multinational corporations who demand the sophistication of quality product in every corner of the globe. Through specification writing, consulting and product selection we offer unmatched product solutions to meet the demands of today's modern buildings, while offering worldwide local support through our vast network of partners and distributors. Fine Buildings, whether new structures or refurbishment, will always need fine quality fittings and Euro Art will be here to provide them, now and in the future.

We hope you enjoy our latest launch of Metals in Motion.

The company embraces the values of customer satisfaction and innovation, integrating these core values into every aspect of its business. By working with EuroArt, you will have access to a whole network of specialist knowledge and product excellence.

ENGINEERED  
TO LAST

## Design Advantage

- Unique designs and shapes offer relief from motionless appearances
- All hardware products in the room are designed to create the same feel and appearance
- Apart from visual impact, certain designs are revolutionary in nature - such as Flip and Sukun

## Materials and finishes

- Solid 316 stainless steel grade materials
- PVD coated black and stain brass finish
- Total of 24 finishes in the range

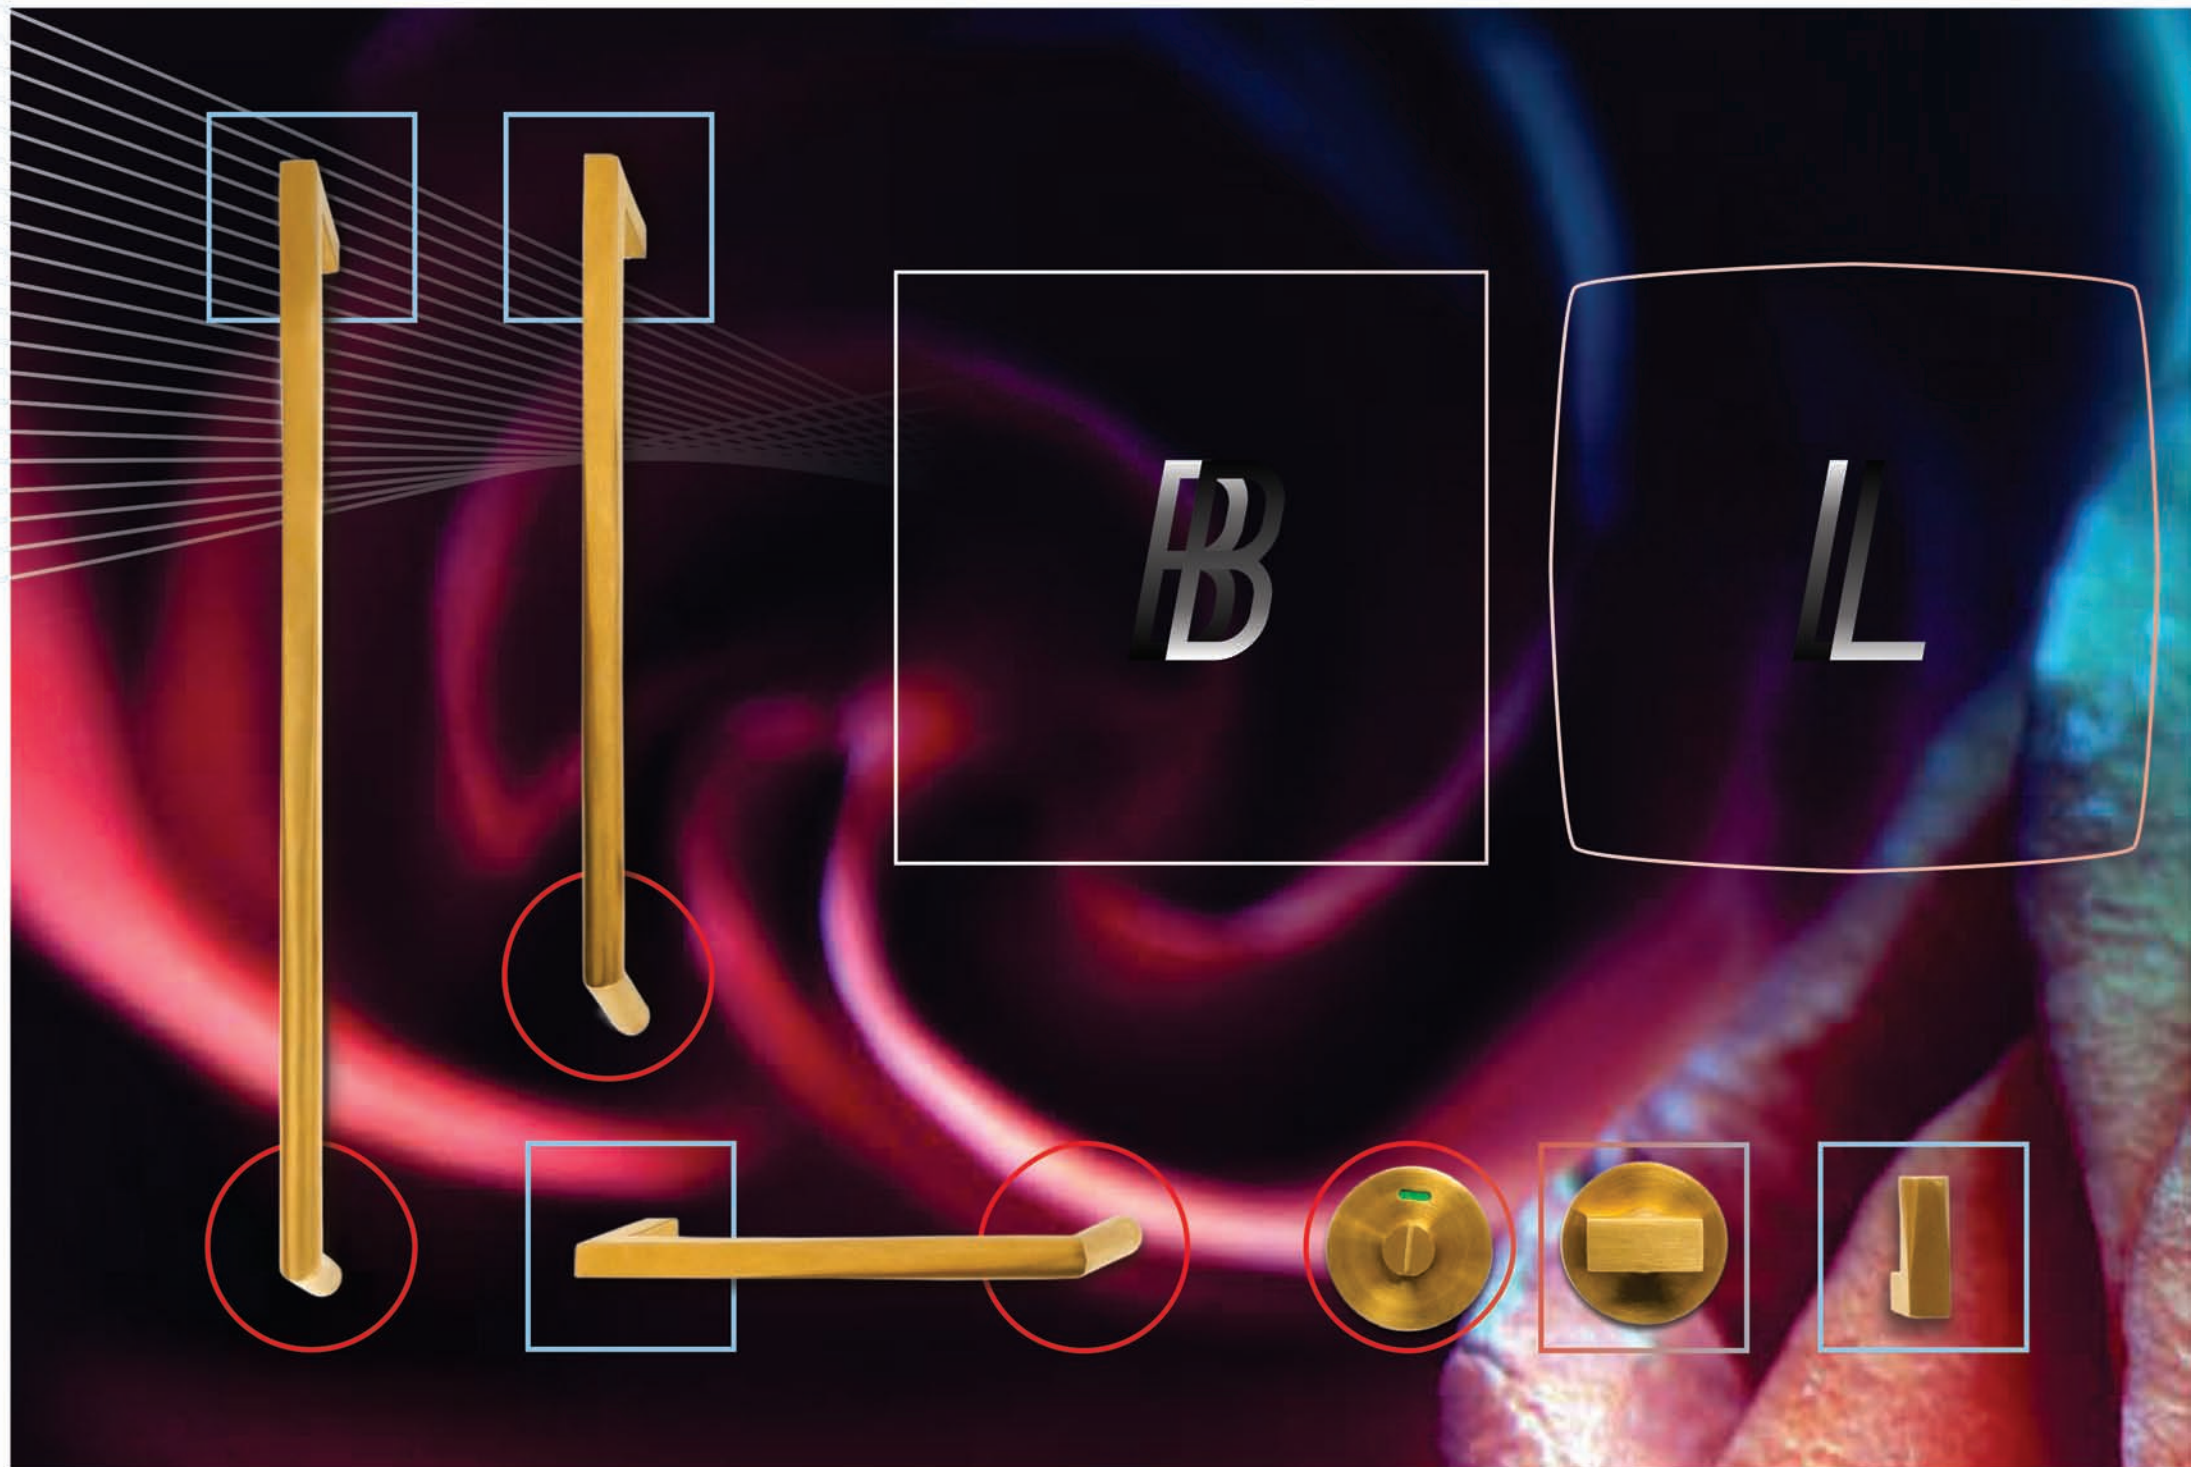

## Concealed bearing technology

- Lever handles are manufactured with ball bearing technology
- 4mm thick roses
- Anti-friction technology
- Noiseless
- Prevents progressive drooping

Engineered to last with solid 316  
Stainless Steel material, combined  
with unique design and concealed  
bearing technology

A stylized, metallic-looking letter 'E' is centered within a rounded square frame. The frame is outlined in a thin orange line. The background of the entire page is a blurred, abstract image of what appears to be a human hand or arm, with a color gradient from teal to red.A stylized, metallic-looking letter 'W' is centered within a rounded square frame. The frame is outlined in a thin orange line.A stylized, metallic-looking letter 'D' is centered within a circular frame. The frame is outlined in a thin orange line.

# FORM INFUSED WITH FUNCTION

The first reaction to Blend is - 'it's impossible!' What starts as a square ends in a circle - and that too, in metal. Blend makes that journey of form seamlessly, without a single instance deviation in contour, consistency or finish. The design is unprecedented and the motion is one of sheer evolution - inspiring interaction and engagement.

# BLEND

BY EUROART

## THE DESIGN PHILOSOPHY

The very essence of metal in motion. The shape transforms seamlessly from square to round.

## A SUBTLE TWIST IN THE PLOT

There's a twist in the plot! Every piece in the Twirl collection has the unexpected, twisting motion created not just for style but also for functionality. The angle and area of twist is designed to ensure the grip is ergonomically comfortable. Twirl is your choice when you want to inspire your space with discovery and exploration.

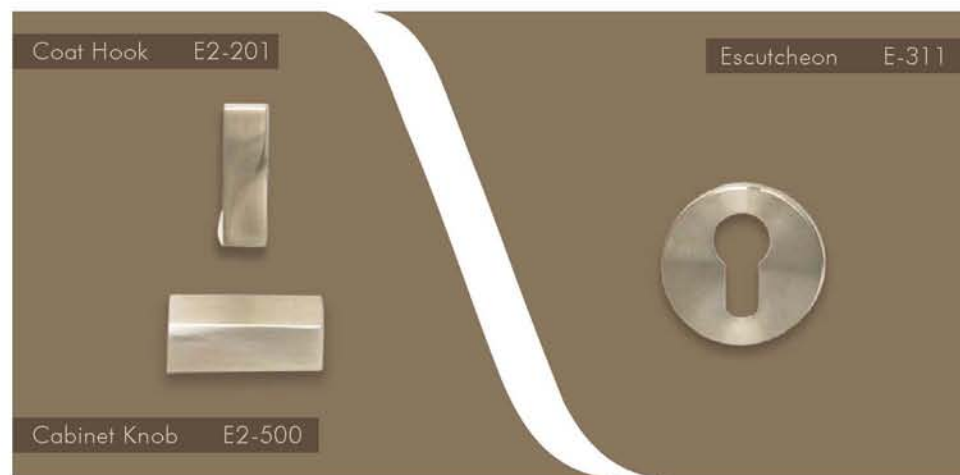

**TWIRL**  
BY EUROART

## THE DESIGN PHILOSOPHY

An unexpected, ergonomic twist in solid metal.

# BEVEL

## EMBRACE THE UNEXPECTED

A fine example of form that lends itself to functionality. The Bevel collection begins its story with utilitarian authority and ends with a soft, contoured curve that is rooted in human-centred design. The design leads the user gently to the function, while protecting him from sharp ends under the curve.

# BEVEL

BY EUROART

## THE DESIGN PHILOSOPHY

Solidity with softness and safety.

## A JOURNEY OF TACTILE CHANGE

From the solid to the slim - and back, each item in the collection inspires the gentle flow of touch. The evolution is smooth and consistent and creates ease of use through unobtrusive functionality and aesthetic simplicity.

A dark grey cabinet with vertical grooves and two brass handles. The cabinet has a semi-circular shape at the back.

morph

BY EUROART

#### THE DESIGN PHILOSOPHY

Achieves a flat look with a semi-circular shape at the back.

TO THE  
POWER OF

45

A straight-line, linear movement of metal ends abruptly in an unexpected angle of 45-degrees. The movement is smooth, accentuated by the clean, European design and tactile softness of the metal. The angle serves a functional need as well - safety, that comes from soft corners.

# SHIFT

BY EUROART

## THE DESIGN PHILOSOPHY

The 45-degree angle has a unique shape but provides a comfortable grip.

## THE GLOW OF GENTLE GROWTH

Inspired by the circle-shaped diacritics placed above letter in Arabic, the Sukun is a necessary symbol for writing consonant-vowel-consonant syllables. The highly recognizable 'leaf' shape creates a sense of familiarity, natural growth and gentle patterns. Sukun is a classic example of form with great function.

منكبي  
BY LOROART

#### THE DESIGN PHILOSOPHY

Traditional Arabesque, leaf motif design.  
Comes in two versions - horizontal and  
vertical.

# ASCEND

## A TRIBUTE TO PROGRESS

Step up to the next level of classic, art-deco inspired design with Ascend. Applied across the collection tastefully, the step-style design feature inspires progressive growth towards a goal, a movement towards a positive direction on the journey to success. The design resonates with concepts of heritage and legacy, accentuated by fine craftsmanship and rich materials.

ASCEND  
BY EUROART

#### THE DESIGN PHILOSOPHY

Art deco progressive movement indicating progress and growth.

# ENTRANCE PULL HANDLES

---

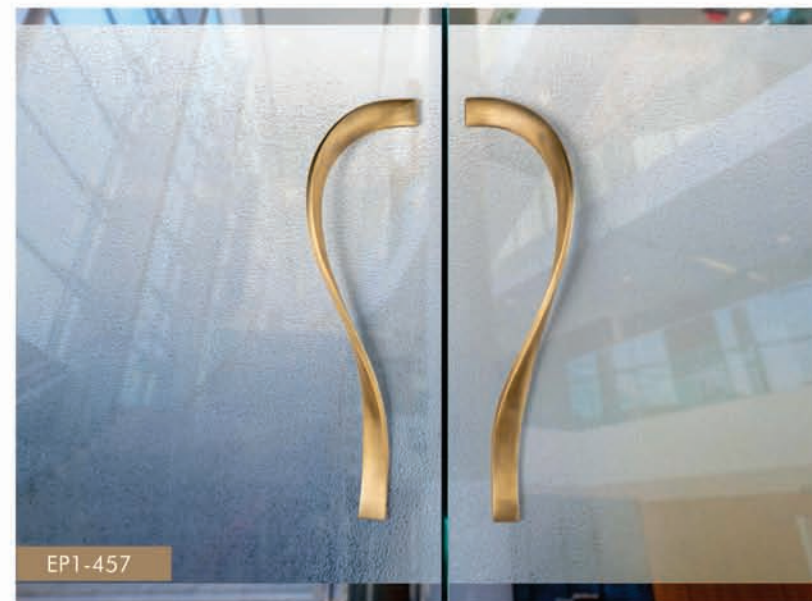

When it comes to pull handles, first impressions are vitally important. It's the first thing customers come into contact with, has the power to create a lasting perception about your environment. These impressions can be created by colour, design, style or finish. It's the hardware that can most often set apart the good from the great.

The key to creating a great first impression that will stand the test of time is to mix style, quality, performance and attention to detail in equal measure. That is exactly what EuroArt is committed to.
